DETAILED ACTION

Election/Restrictions

1. This application contains claims 7-20 drawn to an invention nonelected with traverse in Paper filed 07/18/06. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/14/2006 has been entered.

Claim Objections

3. Claim 6 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The limitation "said plurality of substrates do not form a right angle with respect to said pair of opposed members" is already recited in the newly amended claim 1.

Claim Rejections - 35 USC § 102

Page 3

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-2, 6 and 21-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Laid-Open Publication No. 10-120074/1998 (Tokukaihei 10-120074). Tokukaihei discloses a flexible substrate storage equipment comprising: at least a pair of opposed members (connecting bars 3a & 3b) that constitute an outer frame of a storage equipment main body, wherein said pair of opposed members are disposed so as to maintain a predetermined interval to wedge a plurality of flexible substrates (LCD panels) in between to hold them in a shape of a curve, wherein each of said pair of opposed members includes a plurality of holding members (panel holding portion 4a which slats downward and panel holding portion 4b which is slanted upwards) for holding the plurality of flexible substrates in alignment, said plurality of holding members in a pair being spaced apart from each other, and wherein each of said holding members has a single finger; and wherein said plurality of substrates do not form a right angle with respect to said pair of opposed members, and wherein the holding members are angled so as to define an angle which is not right angle between each holding member and the corresponding one of the opposed members. See Figure 1 embodiment.

Response to Arguments

6. Applicant's arguments with respect to claims 1-2, 6 and 21-27 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to whose telephone number is (571) 272-4558. The examiner can normally be reached on Monday-Friday 7:30-4:00 (EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mickey Yu can be reached on (571) 272-4562. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
